

Our office is easy to locate once you know what to look out for en route but Sat Nav systems have proved to be notorious in sending people to the incorrect road, even Google maps shows us in the wrong location; so we advise that once you are in the general vicinity of our office you ignore the final instructions given by your Sat Nav and follow these instead.

People generally tend to approach our office from one of two ways, the A55 or via Chester City Centre, there are a few more routes available but I won't attempt to explain those in order to avoid any confusion.

Our road is marked below using the red arrow; the red 'x' indicates the aforementioned incorrect road.

Finding our road is simply a case of looking out for the Golf driving range; turn in to the same road as you see that and follow the right hand single track that runs parallel to the ranges, the track will take you straight to a number of offices, there are signs outside each one but ours is the first one under the archway.

Car parking spaces directly in front of our offices are allocated to the various businesses that are located around us so we kindly request you avoid parking in those in order to avoid being asked to move, if you drive past our office and around the corner there is a large car park that anyone can use just a few seconds walk away.

Our road as visible when approaching from the direction of the A55, note the sign and green netting of the Golf driving range in the background.

Our road as visible when approaching from the direction of Chester City Centre, although the Golf driving range is still visible from this side it is slightly harder to spot.
